Former APMA-PAC National Coordinator, Ohio

AAWC-Association for Advanced Wound Care

Pi Delta Honor Society

Research Experience

I have served as PI or Sub-I on human subject research trials since 2012. Dr. Cole has conducted both investigator-initiated and industry-sponsored trials. Her main research focus is on lower extremity wound care. I have published extensively in trade publications and peer-reviewed journals based on case reports, case series, and clinical trials.

- ▼ **A Multi-center Randomized Open-Label Controlled Clinical Trial Evaluating Suction Blister Grafting utilizing a Novel Harvesting Device (CelluTome©) and Standard of Care vs. Standard of Care alone in the Treatment of Venous Leg Ulcers.**

- ▼ **Comparison of LUNA Fluorescence Angiographic Perfusion Assessment to Skin Perfusion Pressures in Evaluating the Effects of Hyperbaric Oxygen Therapy in the Treatment of Chronic Non-healing Wounds**
- ▼ **A prospective, single-blind, multi-center clinical study evaluating the use of MolecuLight i:X as an adjunctive fluorescence imaging tool to clinical signs and symptoms for the identification of bacteria containing wounds** (Sponsor-MolecuLight, Inc.)
- ▼ **A Multi-center, Randomized Controlled Clinical Trial Evaluating the Effect of Fresh Amniotic Membrane in the Treatment of Diabetic Foot Ulcers** (Sponsor-Organogenesis, Inc.)
- ▼ **A Multi-center, Randomized Controlled Clinical Trial Evaluating the Effect of Fresh Amniotic Membrane in the Treatment of Diabetic Foot Ulcers: Crossover Group from Standard of Care** (Sponsor-Organogenesis, Inc.)
- ▼ **Efficacy of TR 984, Beta-1,2-1,6-D-Glucan, in the Treatment of Chronic Venous Insufficiency Ulcers: a Two-Arm, Double-Blind, Placebo-Controlled, Randomized Controlled Trial** (Sponsor- TR Therapeutics)
- ▼ **Electroceutical Wound Dressing in the Treatment of Chronic Venous Leg Ulcers Trial** (Ohio College of Podiatric Medicine (OCPM) Foundation)
- ▼ **A Case Series Evaluating a Fibrillar Collagen Powder Dressing to Treat Chronic, Stalled Lower-Extremity Wounds** (Sponsor- Medline Industries)
- ▼ **A Randomised Controlled Multicentre Trial, Examining the Effect of Natrox® Oxygen Wound therapy on the Healing Rate of Chronic Diabetic Foot Ulcers (NOW.T-001)** (Sponsor-Inotec AMD, Ltd.)
- ▼ **Comparing the Composition of Cutaneous Microbiota on the Plantar Surface and Interdigital Spaces of the Diabetic and Non-diabetic Foot** (Sponsor- Zymo Research Corp.)
- ▼ **A single center pilot case series investigating the effects of a native cross linked extra cellular matrix with PHMB antimicrobial barrier to treat chronic lower extremity wounds exhibiting bacterial contamination as determined by a novel violet-light camera system** (Sponsor-Investigator Initiated)

- ▼ **A Multicenter Phase 3 Trial of Biotherapy using Cryopreserved Human Umbilical Cord (TTAX01) for Late Stage, Complex Non-healing Diabetic Foot Ulcers (AMBULATE DFU)**
(Sponsor-TissueTech Inc.)
